Eclipse	Android Studio
MongoDB	scikit-learn
NumPy	Cassandra
SOAP	CUDA

INTERESTS

Passion for learning new programming languages and using them to create products.

Love going to the gym and riding my bike for long distances.

EDUCATION

BSc in Computer Science @
University of Toronto
September 2016 - May 2021

EMPLOYMENT

Ada Support Inc.

Toronto, Canada | 06/2022 - 02/2023

Senior Software Engineer

React Native Javascript TypeScript AWS Cypress DataDog Python

- Worked on Ada Engagement Team as an on-call engineer.
- Worked in an agile team of 8 engineers throughout the entire software development cycle.
- Implemented and maintained a new Drag and Drop library to help with nested blocks in the response editor.
- Developed components in React Typescript to maximize the efficiency and impact of the engagement with our client
- Developed RESTful APIs in Python.
- Worked alongside UI/UX designers to develop and design Front-end Components in React TypeScript.
- Created E2E tests in Cypress and added to the pipeline to ensure all components were functional.
- Use of Datadog to collect and measure metrics to aid in deciding on which features to focus on prioritizing.
- Resolved support tickets for any incidents.

Klarna

Toronto, Canada | 03/2022 - 06/2022

Software Engineer

React Native Javascript TypeScript SQL AWS Docker Jenkins DataDog

- Worked on the collections/wishlists team.
- Lead multiple epics for the collections team.
- Worked alongside a product manager and other engineers to complete JIRA tickets.
- Worked in an agile team of 6 engineers, and helped prioritize the scope of Epics to make sure high priority tasks were completed first.
- When developing a feature for the Klarna app, I worked through the entire software development cycle and collected feedback along the way to make sure the feature was the most optimal and effective.
- Worked alongside 6 engineers to write scalable code for collections team to increase the usage of our feature by 18% YoY.

Nuvoola AI

Quebec, Canada | 05/2021 - 03/2022

Full Stack Developer

React SQL Node.js AWS Docker Bash Python

- Developed highly scalable software solutions for clients using AWS, React and Node.js.
- Worked alongside UI/UX designers and implemented front end design in React.
- Worked in an agile environment using a JIRA board with weekly sprints.
- Developed RESTful API in python using chalice to deploy serverlessly.
- Built highly scalable distributed cloud applications using AWS.

Bell Canada [Co-Op]

Mississauga, Canada | 05/2019 - 09/2020

Software Developer Specialist (internship)

React Python SQL Node.js Docker Bash Java

- Worked at Bell Mobility for the Charging and Policy Team.
- Created multiple web based tools in React to help automate multiple internal services.
- My projects at Bell would impact a majority of the business and finance department and increases the processing time for parsing phone plan datas.
- Created a platform that would be used by the QA team to create tests and display results in a clean and easy way.
- Received merit awards from managers for outstanding performance

PROJECTS

🌐 Rune Empire
